

Here you can follow

EKHÖJDENS Ö-KULL...

2013-05-19

Time goes really fast now and the puppies are already 6 weeks old. All pups developed normally and follow their weight curves. On average they weigh about 5kg now, which is just like their full siblings in the H-litter. We are trying to change the environment for the puppies at the right pace and with new things to discover every day. Outside puppy paddock they've got to go on some short walks along with Kokos but they also have one by one been exploring some different new environments.

Weight curve for Ekhöjdens Ö-Litter compared with earlier Ekhöjden litters...

The girls are, Mimmi, Kajsa and kicki...

And the boys are, Piff, Puff, Pluto and Musse...

2013-05-04

Another week in the puppy's life has gone by and they are now 4 weeks old. Now we have removed partition wall as parts of the puppy room so now they have the whole room to play around in... Recent experience of rattling cans and sound from the compressor to the nailer they all solved very well! Now it's probably the last period you sit and cuddle for a long time with all seven without getting eaten alive of their razor sharp teeth... It is now also the first time the other females in the flock have been aloud to come into the puppy room. Presto is happy to look through the door but shows little interest in entering..

Convenient to eat and sleep in the same place...

Hey sis how are you?

Kajsa says, now I finally caught the gray pink elephant!

2013-04-27

The puppies are now 3 weeks old and it's time to open the small puppie box, there have already been a number of attempts to escape...

The tiny needle-sharp teeth have started coming out...

Mom is the best after all...

Are we not cute?

2013-04-25

The puppies develop in a furious pace and now they go around in the litter box, even if it is a bit wobbly sometimes!

Kokos do not say no to a break away from the puppies! She willingly follow along on a bike ride when it is offered...

2013-04-21

It is perhaps not surprising that Kokos is constantly hungry given that the puppies now already weighs about 1.4 kg. Kokos is an amazing good mother and spends most of her time with the puppies, she leaves reluctantly the puppies any longer period...

The puppies are about two weeks old and they are more stable and better at moving around for every day. They are also now awake much longer periods than just a week ago...

2013-04-18

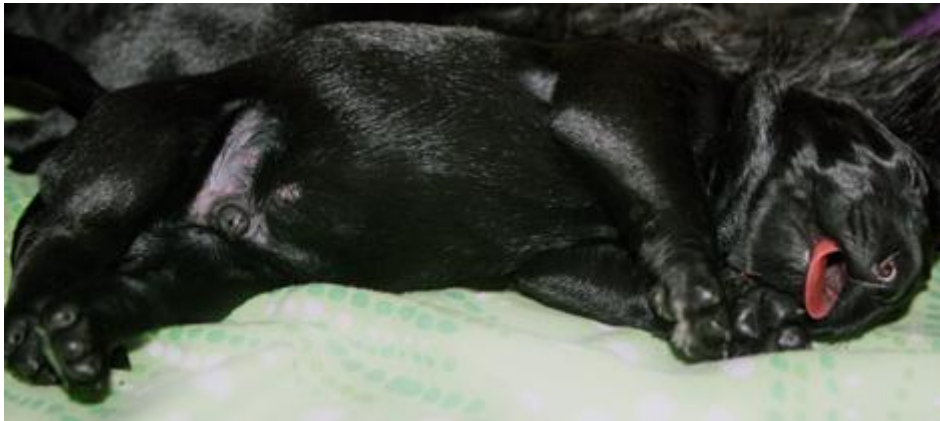

Almost all of them have now opened their eyes and they react to light and darkness. They all have a good appetite and growing as they should!

They are far more active and start having an interest in each other...

2013-04-13

The puppies are now a bit more than a week old and they are becoming much more active for each day.

Even if they still spend lot of time sleeping!

2013-04-07

Today Björn, our vet visiting us. It's time to remove the pups spurs. The puppies are named after some famous Disney characters Mimmi, Kajsa and Kicki are the females the males are Piff, Puff, Pluto and Musse...

Sure, they look a bit like seals :-)

MIMMI

KAJSA

KICKI

PIFF

PUFF

PLUTO

MUSSE

2013-04-06

After a restless morning it's finally time!

Should I sit or lay down?

Ekhöjdens Ö-litter is born!

There were total seven very fine and viable puppies, 3 females and 4 males...

2013-04-05

Today we celebrate our H-litter! Possibly it will be the same birthday for the Ö-litter, or...

Sure Kokos handsome with her big belly :-)

2013-03-31

On long walk with the herd, Kokos on the top! She still follows with light step.

Kokos udder is now huge!

2013-03-25

Today Kokos is moving home to us at Kennel Ekhöjden!

2013-03-05

Sure Kokos is pregnant!

The ultrasound earlier today showed that there are "plenty" of new Ekhöjdare ongoing!

2013-02-13

Now we just have to wait Ultrasound of Kokos is scheduled for Tuesday, March 5...

2013-02-12

Kokos are now also CHV (Canine Herpes Virus) vaccinated...

2013-02-03

Another successful mating between Robbie and Kokos. Kokos dewormed with Droncit.

2013-02-01

With one day old progesterone test showing 5.8 Anneli, Wilma and Gittan with Kokos goes to Schwerin again. Kokos are also dewormed with Banminth. Later in the evening to meet Robbie and Kokos and sweet music arose...

2013-01-31

Sad news, unfortunately no puppies for Olja this time :(Instead, we plan immediately a new mating between Kokos and Robbie! Mating is expected this weekend!

2013-01-22

Kokos and Kobra is now T4 tested without remarks

2013-01-03

Olja is now mated with Robbie! Now we hope that it works as it should...

2012-12-23

Olja has started her maturity period! Now we count days carefully...

2012-12-08

Olja's eyes checked without remarks!

2012-07-01

We started the planning of the Ekhöjden Ö-Litter already early 2012. During the summer Ekhöjdens K'Olja was vaccinated against rabies as we together with Marie & Jonas decided to use Olja for our upcoming litter. We put a lot of effort to find a suitable male to Olja and sure we found some very interesting. One of these was Robbie, which we used for the H-litter, which also was the choice in the end!
